Grattan Rowland IV

(248) 410-3126 ▪ gratrow96@gmail.com ▪ 1838 Mist Wood Dr, Howell, MI 48843

EDUCATION

Michigan State University, East Lansing, MI
Bachelor of Science, Major in Applied and Computational Mathematics December 2020
Minor in Computer Science Engineering

WORK EXPERIENCE

MSU National Superconducting Cyclotron Laboratory & Facility for Rare Isotope Beams, East Lansing, MI
Student Technical Assistant I December 2017 – Present

- Collaborated efficiently with engineers to construct and test software and hardware control systems.
- Built and implemented components for a particle accelerator.
- Fabricated devices to an engineering standard to be capable of withstanding -200 °C in cryogenic chambers or vacuums within gas chambers.
- Demonstrated safety techniques around radioactive waste and hazardous materials. Exhibited practice of 4S safety regulations and lockout/tagout.
- Assembled over 200 separate power supplies, switches, and other mechanisms and electronics for superconducting magnets.
- Designed, developed, and tested covers and enclosures for dangerously high voltage and current applications.

IOvAGE, Brighton, MI
IT Technician October 2015 – August 2016

- Optimized software and hardware to improve performance and output of network and CNC Mills.
- Constructed servers and synthesized multiple networks.
- Configured wiring and software setup of network infrastructure, mapping, and CCTV feeds.
- Visualized and designed layouts for enclosures and infrastructure mappings with CAD.
- Repaired over 100 CNC Mills and their respective computer hardware.

PROJECTS

British Petroleum Company PLC, East Lansing, MI
Whiting Steam Production Facility Analysis March 2016 – May 2016

- Ascertained production outputs of steam for a BP power facility to measure cost effectiveness.
- Wrote and compiled MATLAB functions and scripts to analyze production output efficiently.
- Reported all findings in a formal report involving outputs and code used to analyze data.

MSU National Superconducting Cyclotron Laboratory & Facility for Rare Isotope Beams, East Lansing, MI
Cyclotron Stopper Construction May 2019 – December 2019

- Executed the installment of supporting components for a Cyclotron Stopper.
- Securely mounted racks, and installed, plumbed, and grounded power supplies for water cooling.
- Mapped and laid out high-current wiring for power supplies and superconducting magnets.

SKILLS & RELEVANT COURSEWORK

Languages: English & German.
Technical Skills: C++, Python, C, Object-Oriented Program Design, Agile, SCRUM, SDLC, MATLAB, Simulink, VHDL, PSpice, MathStudio, Wolfram Mathematica, Combustion Engines & Powertrains, Circuits & Systems, AutoCAD, Revit, & Inventor.
Relevant Coursework: Discrete Mathematics, Algorithms & Data Structures, Linear & Abstract Algebra, Digital & Predicate Logic, Ordinary & Partial Differential Equations, Intro to Machine Learning, Numerical & Data Analysis, & Object-Oriented Programming.
